EDUCATION

Applied Sciences Baccalaureate

2020

Elaraki School

Marrakech

5th year software engineer - Computer Engineering

Sep 2020-july 2025

National School of Applied Sciences

Agadir

SKILLS

Programming Languages Java | JavaScript | TypeScript | C++ | C | C# | Python | PHP

Technologies Git | Docker | Next.js | Spring Boot | React | React Native | Oracle DB | MySQL | PostgreSQL | MongoDB | Ionic | Linux

Software Design Object-Oriented Design | Design Patterns | UML | MVC Architecture | Microservices | Agile Methodologies

EXPERIENCE

Internship at Sopra Banking Software

Mar 2025-Aug 2025

Software Developer

Casablanca

Internship at Amenal IIc

Feb 2024-Jul 2024

Developer for a Multiplatform Application

Agadir

- Developed a customized web and mobile application for managing construction projects, tailored to meet the company's budgeting needs.
- Designed a user-friendly interface that enables project managers to efficiently manage budgets, track purchases, and oversee crucial project aspects (payments, invoices, reception) from both mobile and desktop platforms.

NOTABLE PROJECTS

Personal Portfolio Website

2025

Web Project

- Developed a modern, responsive portfolio website using Next.js and Tailwind CSS, enabling performance and user experience.
- Integrated Vercel for seamless deployment, handling CI/CD, and providing a fast, globally distributed hosting solution.
- Showcased personal projects, skills, and blog posts, enhancing online presence and accessibility.

Simplified Compiler for a Custom Language

2024

Low-Level Project

- Developed a basic compiler for a custom-designed programming language, focusing on grammar and syntax definition.
- Implemented a lexer and parser to tokenize input and generate an Abstract Syntax Tree (AST), and performed code generation into a low-level language using C++.
- Gained insights into how high-level features translate into low-level operations, including memory management and CPU interactions.

Gym Management Application

2023

Java Application Project

- Developed a Java-based application for gym management, providing employees with tools to manage clients, offers, and offer categories effectively, with secure login and signup functionalities.

Library Management System

2023

Web Application Project

- Designed a library management system with a user-friendly interface for administrators to search for books, manage member records, and track book loans. Built using HTML, CSS, JavaScript with jQuery, and a MySQL database for storage.
- Implemented core functionalities such as member and book management, loan tracking, and penalty calculation, with separate layers for user interaction and backend operations using PHP and JavaScript.
