Experience

Sopra Banking Software (SBS) **Mar 2025 – Present**

Software Engineer *Casablanca*

- Joined as an intern, then hired on a permanent contract following the delivery of the project's first phase.
- Member of the squad responsible for positions and operations management, covering the web and mobile versions of the overdraft decisioning system, now live in production at CIH Bank.
- Built the mobile frontend end to end (React Native, Expo, Redux), used daily by bank branch managers to process overdraft requests.
- Developed backend business logic for the decisioning engine (Spring Boot): validation rules, case processing, and returning decisions to the client.
- Designed and implemented authentication and authorization (Keycloak, OAuth2), securing access to sensitive financial operations.
- Built Backend-for-Frontend services: request routing, mobile user enrollment, and real-time push notifications.
- Diagnosed and resolved production incidents in direct coordination with the DevOps team: deployments, hot-fixes, and release follow-up.
- Worked across the full stack – from UI to APIs and database – with full autonomy on the mobile scope.

Amenal LLC **Feb 2024 – Jul 2024**

Full-Stack Developer – Internship *Agadir*

- Gathered requirements directly from the company owner: replacing a legacy MS Access database with a mobile solution to remotely track assets, budgets, staffing, and safety measures across multiple construction sites.
- Started the frontend in React Native, then migrated the stack to Ionic mid-project when React Native's ecosystem could not support the complex tabular interfaces required.
- Delivered the budgeting module end to end in a two-person team, integrated with a Spring Boot backend and a relational database.

Projects

SUPART Lab – supart-lab.com **2025**

React, SCSS, Python

- Web platform for an art gallery, showcasing its exhibitions and featuring 360° virtual tours of the galleries.
- Custom admin panel allowing the client to manage galleries and content independently.
- Built in a team of three, covering frontend (React, SCSS) and backend (Python), delivered and live.

Skills

Languages	Java | JavaScript | TypeScript | Python | C++ | C#
Frontend	React | React Native | Expo | Redux | Next.js | Tailwind CSS | SCSS | Ionic
Backend	Spring Boot | Node.js | BFF Architecture | REST APIs | Microservices
DevOps & Tools	Docker | Git | Linux | Nginx | Keycloak | OAuth2 | CI/CD
Databases	PostgreSQL | MySQL | MongoDB | Oracle DB
Languages	English (fluent) | French (fluent) | Arabic (native)

Education

State Engineering Degree – Computer Engineering **Sep 2020 – Jul 2025**

National School of Applied Sciences (ENSA) *Agadir*

Applied Sciences Baccalaureate **2020**

Elaraki School *Marrakech*

Certifications

- **IBM** Application Development using Microservices and Serverless – Professional Certificate
- **HackerRank** Problem Solving
