EXPERIENCE

Sopra Banking Software (SBS) **Mar 2025 – Present**
Software Engineer *Casablanca, MA*

- Hired on a permanent contract after delivering the first phase of an overdraft decisioning system, now in production at a major Moroccan bank.
- Gave branch managers a mobile tool to process overdraft requests on the go, extending a desktop-only workflow. Built the app end to end in React Native, Expo, and Redux.
- Cut the case regularization batch runtime from **8 hours to 45 minutes** ($\sim$10$\times$ faster) by switching to incremental processing: added an indexed "processed" flag so each run skips already-handled cases instead of reprocessing the full dataset.
- Reduced client summary generation time by $\sim$**70%**.
- Kept mobile clients fast and decoupled from core banking APIs by designing Backend-for-Frontend services for routing, user enrollment, and real-time push notifications.
- Secured access to sensitive financial operations with Keycloak and OAuth2 authentication and role-based authorization.
- Restored service during production incidents by diagnosing root causes and shipping hotfixes with DevOps.

Amenal LLC **Feb 2024 – Jun 2024**
Full-Stack Developer Intern *Agadir, MA*

- Moved multi-site construction tracking (assets, budgets, staffing, safety) off a legacy MS Access database and into a mobile app, giving the owner remote visibility across sites.
- Assessed the app's data-heavy table requirements and recommended and led a mid-project switch from React Native to Ionic, a better fit for that workload.
- Delivered the budgeting module end to end in a two-person team, integrated with a Spring Boot backend and a relational database.

PROJECTS

SUPART Lab – supart-lab.com **2025**
React, SCSS, Python

- Web platform for an art gallery, showcasing its exhibitions and featuring 360° virtual tours of the galleries.
- Custom admin panel allowing the client to manage galleries and content independently.
- Built in a team of three, covering frontend (React, SCSS) and backend (Python), delivered and live.

SKILLS

Programming	Java | TypeScript | JavaScript | Python
Mobile & Frontend	React Native | Expo | Redux | React | Next.js | Ionic | Tailwind CSS | SCSS
Backend	Spring Boot | BFF Architecture | REST APIs | Node.js
Security & DevOps	Keycloak | OAuth2 | Docker | Git | Linux | Nginx | CI/CD
Databases	PostgreSQL | Oracle DB | MySQL | MongoDB
Spoken	English (fluent) | French (fluent) | Arabic (native)

EDUCATION

State Engineering Degree – Computer Engineering **Sep 2020 – Jul 2025**
National School of Applied Sciences (ENSA) *Agadir*

Applied Sciences Baccalaureate **2020**
Elaraki School *Marrakech*

CERTIFICATIONS

- **IBM** Application Development using Microservices and Serverless – Professional Certificate
